What People Say

Steve Chan:

Superb service! Friendly, great advises and fair price. Took less than 6 hours to solve my iPhone problem (including pick-up and delivering back to me); while the A-official service center can't even get me an appointment to send the phone in for inspection in next 6 days.

Lim Lee:

Jerry changed the battery of our iPad and iPhone, and reprogrammed our MacBook. His prices are very reasonable. Very prompt. Picks up from you and drop them back to you either on the same day or day after. Highly recommended

Yuri Lye:

Good customer service and very reliable. He is also very accommodating and work within my schedule to get my phone fixed despite being late at night and returned my phone within half an hour. Highly recommended
